SUSPENDED VERTICAL FILING EQUIPMENT

## Modern ACCOFLEX...3 times faster than conventional d

ACCOFLEX folders use gravity to keep tabs visible; materials neat, accessible—and that's what good filing must do!

Open drawer.

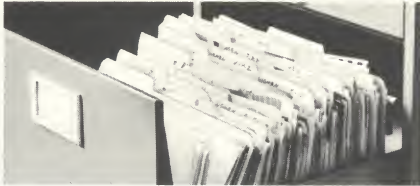

Spot guide, finger open filing "V".

File paper into folder.

Close drawer.

In drawer files, folders slump and sag out of sight—reduce speed and accuracy—even with holding device.

Open drawer.

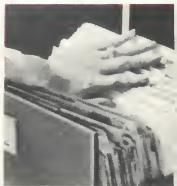

Loosen holding device.

Spot correct guide.

Finger thru folders behind guide to find folder.

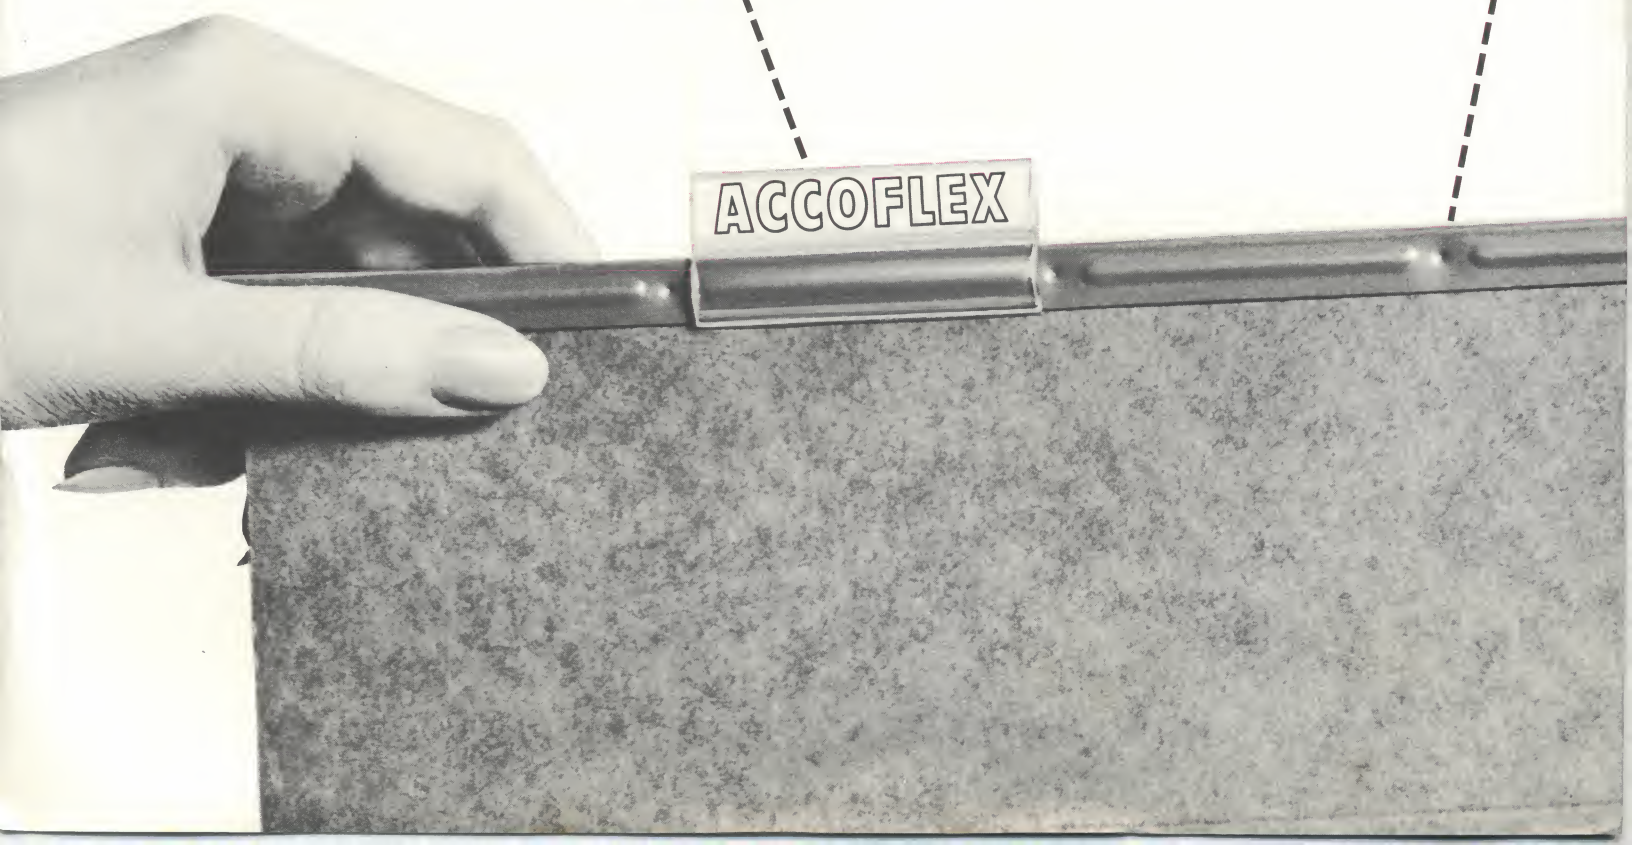

Push and pull to create filing "V".

## Modern ACCOFLEX...3 ways better than conventional ha

**1 Instant visual control**  
Clear Tenite plastic tab is tilted at the precise angle for instant visibility. Snaps onto folder instantly—use it as a handle! Sets at any of the multiple tab positions for perfect alignment. Accommodates both paper label and celluloid color window.

**2 Superior Folder Strength**  
Rigid steel runner is permanently bonded across folder top to prevent wear, tear, wrinkles, soiling. Anchors tab, provides 5 snap-in positions. Baked enamel surface protects runner, enhances its smart, modern appearance.

rawer filing...

and requires less space too!

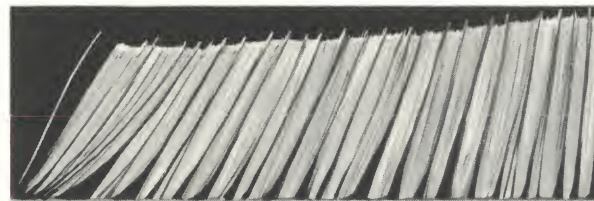

File paper into folder.

Re-compress holding device.

Close drawer.

Proved in actual test! 25 ACCOFLEX folders, with 200 inner folders, each with 10 sheets of paper, measured 14 inches.

Conventional filing with 25 pressboard dividers, plus 200 manila folders, each with 10 sheets of paper, measured 15 inches—that's 7% wasted space!

nging folders...and costs no more!

3

**Effortless Sliding Action**

Runner bearing-edge is rolled steel: presents a virtually frictionless surface that glides effortlessly along the frame. Flick through folders—empty or full—with perfect ease! Delivers increased filing speed and accuracy.

**Design superiority—  
engineered by ACCO**

For example, the smart, modern Mobile Unit. Neatly supports and smoothly transports the Accoflex folders anywhere in the office.

This versatile file holds a double-row of letter-size or a single-row of legal-size or a row of each.

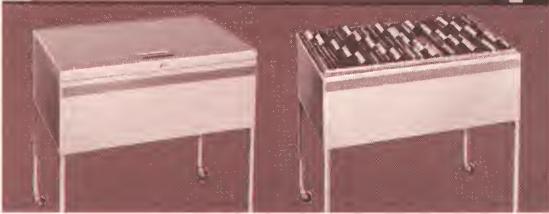

Makes an ideal roving reference file, transfer file or deskside file.
